

PRESS RELEASE

Enapter AG expands its software capacity in the USA

Berlin (28th February 2022); Enapter (WKN A255G0), the fast-growing electrolysis specialist for modular and decentralized hydrogen systems offers a comprehensive software solution, the Enapter Energy Management System Toolkit (EMS Toolkit), that supports the monitoring and control of mixed systems based on renewable energies. Enapter's new development center will open on March 1st near Seattle.

One of the first main goals for Enapter's development center in the USA will be the development of OPC UA interfaces and UA NodeSets to simplify the integration of clusters of Enapter Electrolysers and AEM Multicores in heterogeneous industrial environments and HMI interfaces. The Open Protocol Communications Unified Architecture (OPC UA) is a platform independent, service-oriented architecture that specifies information exchange for the industrial communications widely adopted in many industries.

The latest release of the Enapter Gateway energy site controller already opens up the possibility of integrating third-party devices with Enapter's EMS Toolkit via the OPC UA protocol. This approach enables the development of open-source Enapter blueprints for a variety of industrial assets. All blueprints will be available in a public repository at <https://github.com/Enapter/marketplace>.

"We are happy to open our development center with experts from the OPC UA field. At the same time, we are glad to be able to offer local software integration support to our growing US customer base", says Sebastian-Justus Schmidt, CEO of Enapter AG.

About Enapter

Enapter is an award-winning energy technology company producing highly efficient hydrogen generators to replace fossil fuels. Its patented and proven Anion Exchange Membrane (AEM) technology allows for the mass production of low-cost, plug-&-play electrolyzers for green hydrogen at any scale. The modular systems are used in 44 countries in sectors like energy, mobility, industry, heating and telecommunications. Enapter has offices in Italy, Germany, Thailand and Russia.

Enapter AG is listed on the regulated market of the Frankfurt and Hamburg stock exchanges, WKN: A255G0.
