Enapter AG secures new customers for electrolyzers from Europe to Asia

- ≡ Additional confirmed orders from the UK, Czech Republic, and Thailand
- ≡ Strong demand for both single-core and multi-core electrolyzers
- ≡ Produced green hydrogen to decarbonize energy-intensive processes

Berlin, November 27, 2023. Enapter AG (ISIN: DE000A255G02) is experiencing a consistently growing demand for its modular AEM electrolyzers, designed to produce green hydrogen for various applications. In recent weeks, the company has acquired new customers in Europe and Asia. The recently sold devices belong to both the single-core and multi-core product lines of the company and are scheduled for delivery throughout the fiscal year 2024.

Among the newly acquired customers is a British cleantech company to whom Enapter will supply 40 AEM Electrolyzers EL 4. Additional 20 EL 4 units Enapter will deliver in 2024 to an industrial company in Thailand, planning to use the devices in the power-to-power sector.

After their successful launch of the AEM Flex 120 in Q3 2023 and the expansion of their product range, Enapter AG has also renamed its megawatt system previously known as "AEM Multicore" to "AEM Nexus" which is offered in various sizes.

Czech building materials company Unigranit recently ordered an AEM Nexus with a capacity of 500 kW, which is intended to be expanded to 1 MW in the long term. The hydrogen produced using green energy from a nearby wind farm will be injected into Unigranit's gas mix to make their production processes more sustainable.

Sebastian-Justus Schmidt, CEO of Enapter, commented, "Winning new international customers with innovative applications for green hydrogen once again demonstrates our strong global market positioning. The demand for solutions in the market for hydrogen production across all scales and sectors is enormous. Decarbonization is gaining momentum worldwide. With our modular and freely scalable product range, we can cover a wide spectrum of solutions like no one else in the market. In fact, any idea and innovation related to green hydrogen can be quickly realized with an Enapter solution."

About Enapter

Enapter is an innovative energy technology company that manufactures highly efficient hydrogen generators – known as electrolyzers – to replace fossil fuels and thus drive the global energy transition. Their patented and proven Anion Exchange Membrane (AEM) technology enables the

series and mass production of cost-effective plug-&-play electrolysers for green hydrogen production at any scale and any place. Their modular systems are already used worldwide in the energy, mobility, industrial, heating and telecommunications sectors. Enapter has its main office in Germany and production site in Italy.

Enapter AG is listed on the regulated market of the Frankfurt and Hamburg stock exchanges, ISIN: DE000A255G02.
